

CSP customers to be notified of MCA acceptance.

When you as Microsoft Partner purchase a subscription or consumption service in CSP in TD SYNnex StreamOne platforms, you are required to accept the Microsoft Customer Agreement (MCA) on behalf of your customer. This is a requirement from Microsoft, as it is required, you have the accept from your customer to accept the agreement on behalf of your customers.

From April 15, Microsoft has started to notify CSP customers of their acceptance of the Microsoft Customer Agreement (MCA). The customer notice ensures Microsoft adheres to compliance and regulatory requirements related to the agreement.

The objective of this email communication is to ensure the customer knows they've accepted the MCA and to refer the customer to their transacting partner if they have questions.

Next steps for partners:

- Review this information and share as appropriate within your organization.
 - Be prepared to provide evidence of the agreement acceptance to your customer upon request.
 - [Read the Microsoft FAQ to understand details and see a copy of the mail notification](#)
